Cross-Border Roaming

Autotrak's cross-border roaming service Terms and Conditions:

- The Cross-Border Roaming Service is billed monthly per vehicle, in line with Autotrak's standard billing cycle.
- Activation requires a lead time of approximately 72 hours. Please note that no pro rata billing applies; the full monthly premium will be charged as per your official Autotrak quotation.
- Once activated, the Cross-Border Roaming Service will remain active until Autotrak receives a written request for deactivation.
- All activation and deactivation requests must be submitted in writing, either through your allocated Autotrak Key Accounts Consultant or via email to info@autotrak.co.za
- Cross-Border Roaming Services are available for all Autotrak vehicle tracking products.
- Cross-Border Roaming services are offered under a fair usage policy. Should additional data be required, the cost will be charged to the customer's account over and above the standard monthly Cross-Border Roaming premiums. Please note that certain SADC countries apply higher per-megabyte data fees, which may result in faster depletion of available data compared to other regions. If a customer's data allocation is fully depleted, additional data can be purchased directly from Autotrak. Any additional data charges will be billed to the customer's account in addition to the standard monthly premiums. Requests to purchase additional data must be submitted in writing to your allocated Autotrak Key Accounts Consultant or via email to info@autotrak.co.za
- Cross-Border Roaming Services provide customers with basic vehicle tracking functionality only. Peripheral hardware and services, such as cameras, will not operate outside the borders of South Africa.
- Autotrak's standard Terms and Conditions of sale apply solely to vehicles operating within South Africa. When a vehicle travels outside South African borders, additional charges may apply for any extra services required. These charges may include, but are not limited to, data usage fees, Vehicle recovery Fees, and service support costs.
- Autotrak hardware used outside South Africa is not covered under the Autotrak warranty, nor subject to South African service conditions, unless the hardware was purchased through an approved Autotrak distributor in the relevant SADC country.

Autotrak cannot guarantee real time data services in other countries as we are reliant on the respective countries GSM network.
