

## **AutoCam Dashboard Collection Group Feature**

**V1 27.01.2026**

## 1. AutoCam Dashboard Collection Group Feature

The AutoCam Dashboard Collection Group feature is designed to give fleet managers a more targeted and configurable view of the cameras installed on selected vehicles within their fleet. Instead of displaying all camera views for every vehicle, this feature allows users to create named collection groups and assign specific camera views to the relevant vehicles, aligning with operational needs.

This feature is available on all web-based Autotrak product platforms.

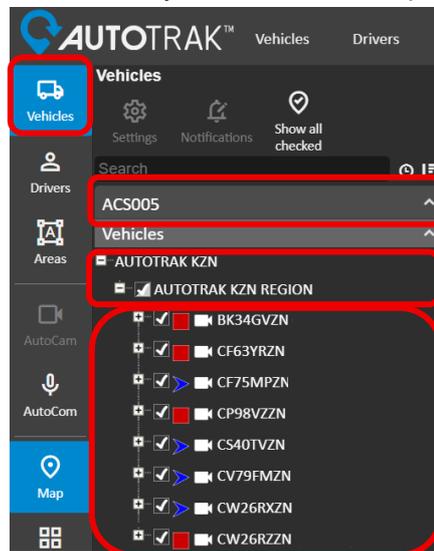

## 2. How to Use the AutoCam Dashboard Collection Group Feature

### Step 1: Log in

Log in to the web-based software using your user credentials.

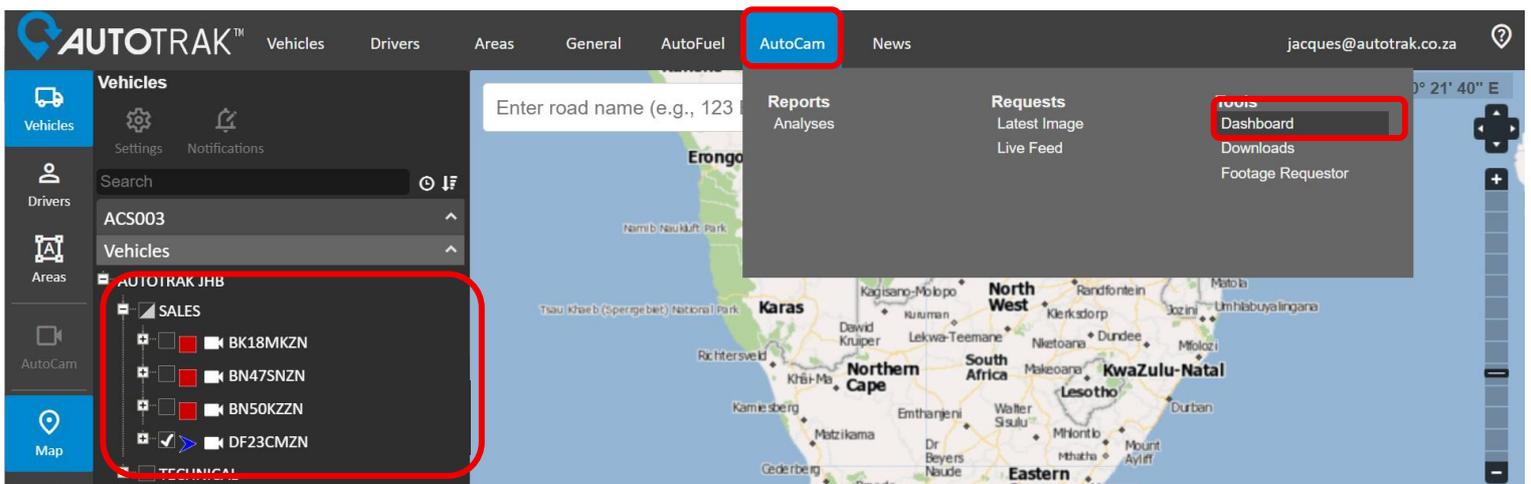

### Step 2: Select vehicles or departments

To activate the feature, select the department or vehicle(s) for which you wish to create an AutoCam Collection Group. Only the selected vehicles will be included in your Collection Group/Camera Dashboard.

### Step 3: Navigate to the Dashboard

Go to the **AutoCam** menu and select **Dashboard**.

## Step 4: Create a Collection Group

### 1. View Existing AutoCam Collection Groups

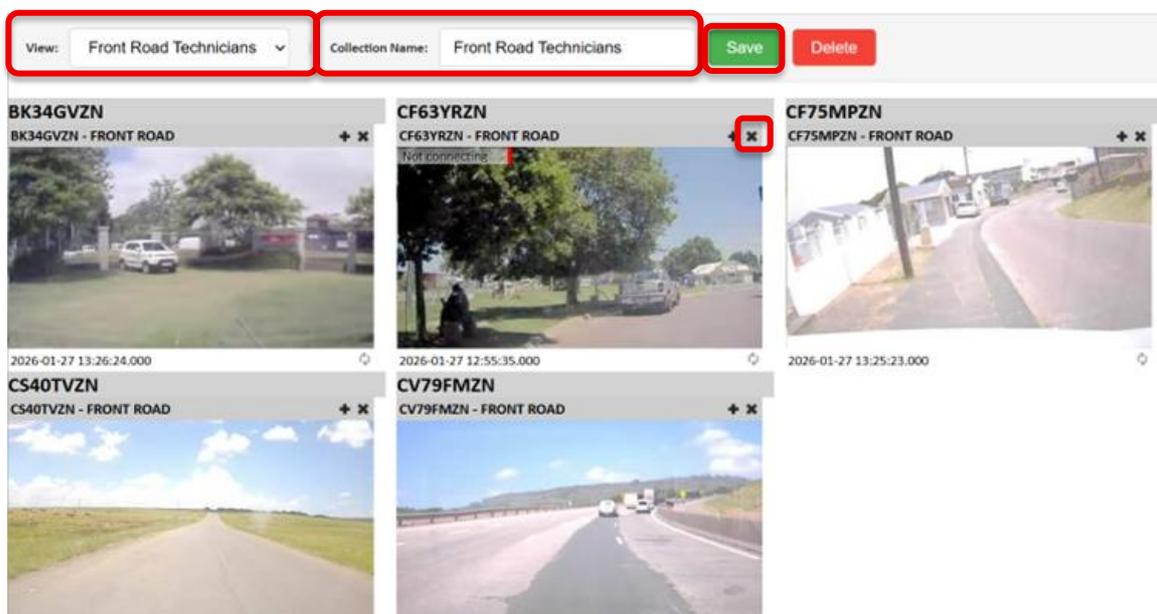

In the View Box, you can see any previously created AutoCam Collection Groups.

### 2. Create a New AutoCam Collection Group

- Enter your desired name in the **Collection Name** box.
- Assign specific camera views to the collection (e.g., front-view camera).
- Manually deselect any camera views that are not required by clicking the “X” icon on the left-hand side of each camera view.

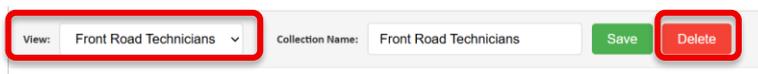

### 3. Save the AutoCam Collection Group

Once the required views and vehicles have been selected, click **Save** to create the new AutoCam Collection Group.

## Step 5: Manage Collection Groups

- If an AutoCam Collection Group is no longer required, it can be deleted.
- You may create and add as many AutoCam Collection Groups as needed for your fleet.

Thank you should have any further queries please email [info@autotrak.co.za](mailto:info@autotrak.co.za)
