

**Intelligent in-cab communication
for safer, smarter fleet operations.**

Keep your drivers connected, informed and protected with intelligent, safe voice communication.

Features:

-  Fully integrated with the Autotrak Web Software platform and Mobile App (Android & iOS).
-  In-cab communication device allowing drivers to contact up to three pre-configured contacts directly from the hardware.
-  Fleet operators can remotely configure and manage contact points on Autotrak's Web Software platform.
-  Rugged, purpose-built hardware with three colour-coded illuminated buttons for simple driver operation.
-  Supports unlimited authorised users, allowing direct voice communication with the appropriate individuals in the vehicle through AutoCom hardware.
-  Real-time automated voice prompts for critical fleet events.
-  Compatible with additional Autotrak peripheral products for expanded functionality.
-  Monthly subscription includes all communication and data costs with no hidden charges.
-  Availability of AutoCom web software reports.
-  Daily Automatic unit health checks.
-  Forms an integral component of Autotrak's Advanced Driver Assistance System (ADAS).
-  Suitable for utilisation across a wide range of automotive vehicle applications.
-  *Cross-border roaming capability.
-  Backed by Autotrak's lifelong contractual warranty.
